

For Immediate Release

Palmetto Air & Water Balance Acquires Assets of Medley Service Co.

(Greenville, SC: January 28, 2011) Palmetto Air & Water Balance, a leading provider of Testing, Adjusting, and Balancing (TAB) services for clients throughout the Southeast, recently acquired assets of Gaffney, SC-based Bi-State Services & Sales, Ltd (DBA Medley Service Co.).

Medley Service Co. was founded in 1986. Former Owner Mickey Medley will continue to provide services on an as-needed basis, while the firm's other staff members, Michael Medley and Paul Killian, will join the Palmetto Air & Water Balance team at the company's Charlotte, NC location.

"We are proud to have been selected by Mickey Medley to take care of his customers and employees in the future," says Penny Hinton, owner and president of Palmetto Air & Water Balance. "We believe he chose us because of our reputation in the industry for efficient work and quality services."

The decision to move forward with the asset purchase of Medley Service Co. was a strategic move by Palmetto Air & Water Balance as the company looks to gain additional market share in the South Carolina and North Carolina region. The transaction was finalized January 28, 2011.
